shayanbehnaz@gmail.com [Portfolio](#) [GitHub](#)

Summary

UX researcher with academic backgrounds in Psychology and Business Administration and hands-on experience in user research and interaction design. Experienced in qualitative user research, usability evaluation, and iterative design. Interested in Human–Computer Interaction (HCI), Human-Centered AI, and user behavior.

Education

MBA: Keimyung University, South Korea

SEP 2021 - AUG 2023

UX/UI Design Certificate: UXland Online School, USA

AUG 2022 - MAY 2023

Psychology: Payam Noor University, Iran

SEP 2009 - FEB 2014

Research & Design Experience

Goal-Setting App: [Flexidule](#)

APR 2024 - OCT 2024

- Planned and conducted qualitative user research, including semi-structured interviews, surveys, affinity mapping, and usability evaluations.
- Investigated how flexible scheduling influences user stress, accountability, and task completion, translating research findings into iterative design improvements.
- Designed interactive prototypes in Figma to evaluate and refine scheduling concepts.

Classified Ad Website: [Seewalls](#)

SEPT 2023 – APR 2024

- Designed the information architecture and provider workflow for a web/mobile classified advertisement platform.
- Conducted competitor analysis and iteratively refined interface structures to improve usability and task flow.

Research Methods

Literature Review • Semi-structured Interview • Thematic Analysis • Survey Design
• Participatory Design • Usability Testing • Affinity Mapping • Heuristic Evaluation

Design Skills & Tools

Interaction Design • Information Architecture • Wireframing • Interactive Prototyping
Accessibility-aware Design • Figma • FigJam • Miro • Google Forms

AI & Programming

Machine Learning Fundamentals • Python (Basic)

Languages

Persian (Native) • English (Professional Working Proficiency) • Korean (Pre-intermediate)
